About IRON Financial, LLC

IRON Financial is an asset manager and independent retirement plan fiduciary serving a diverse universe of financial intermediaries, institutions, financial advisors, and private businesses. Since 1994, we have prided ourselves on the integrity, independence and innovation that continue to earn us the trust and confidence of our clients. IRON Financial is an accredited ERISA 3(38) Investment Fiduciary that provides comprehensive solutions to the qualified retirement plan marketplace. IRON goal is to provide exceptional investment strategies and products free from conflicts of interest while also delivering highly personalized, dependable service to its clients. IRON remains steadfast in its commitment to continuous innovation and fiduciary responsibility to its clients. Collectively, IRON is responsible for AUM of $3.45 billion as of September 30, 2017.

Job Summary

The SQL Server Senior Database Developer will be a key member of the IT and quantitative research departments. He or she will work closely with the Senior DBA, Managing Director of Investment & Quantitative Research, and other members of the Research and Portfolio Management teams in providing database support for our investment products and strategies.

Responsibilities

- Create models for new database development and/or changes to existing ones
- Respond to and resolve database access and performance issues
- Monitor database system details, including stored procedures and execution time, and implement efficiency improvements
- Participate in technical and business discussions, share ideas, and provide feedback with the goals of continual improvement of the firm's IT operations
- Support daily data loads and resolve maintenance tickets
- Work with our partner firms and data vendors in creating and integrating new daily data feeds
- Assist analysts and other personnel with ad hoc data requests
- Assist analysts with creating and optimizing queries

Qualifications

- Bachelor's degree or equivalent is required, MS preferred, but not a requirement
- Minimum 3-5 years of experience working with large data-warehouse databases
- Detailed knowledge of MS SQL Server, SQL Server Management Studio (SSMS), Integration Services (SSIS Packages), and Reporting Services is a must
- Experience with SQL Server 2016 and R integration is a plus
- Hands-on SQL Server database performance fine tuning, security management and troubleshooting experience is a must
- 2+ Years Microsoft .Net Development experience (ASP.net, C#, VB.NET, Visual Studio, IIS) as well as Javascript/Jquery is strongly desirable
- Basic knowledge of R is a plus
- Experience in Financial Services / Asset Management Industry / Bloomberg API / Morningstar Direct is a big plus
- Must possess strong oral and written communication skills
- Ability to work on projects that involve multiple departments

DISCLAIMER

This job description is *not* intended, and should not be construed to be, an exhaustive list of all responsibilities, skills, efforts or working conditions associated with the job. It is intended, however, to be an accurate reflection of those principal job elements essential for making decisions related to job performance, employee development and compensation. As such, the incumbent may perform other duties and responsibilities as required. Its contents imply no contractual obligation and may be changed by the company at any time.
