Disclosures

For time periods between December 1, 2003 and March 31, 2022, management fees of 0.70% annually, our highest published fee during that period, have been deducted from gross performance results for the IRON High-Quality Equity Portfolio (“High-Q”). From April 1, 2022 onward, management fees of 0.59% annually are deducted from gross performance results. Client accounts are charged quarterly in arrears based on the quarter-end value adjusted for capital flows. Net returns reflect a monthly accrued deduction of management fees. IRON’s fees are available upon request and may be found in our Form ADV Part 2A disclosure brochure.

Investments within portfolios, and therefore, portfolios, involve risk and the possibility of loss, including a permanent loss of principal. Performance results are based on a hypothetical model portfolio from inception of December 1, 2003 through August 31, 2020. No accounts were managed using this portfolio during this period. From August 31, 2020 to the present, performance results are based on a composite consisting of eligible client accounts. Inclusion of an account within the composite is determined on a monthly basis, requires investment in the High-Q portfolio for the entire calendar month, and a beginning monthly balance of at least \$100,000. Performance for periods longer than a year has been annualized using a geometric mean.

The model performance shown is hypothetical and for illustrative purposes only. Model portfolio monthly returns were computed based on the daily total returns of underlying securities. Model performance does not include trading costs. Performance data for the model assumes reinvestment of dividends but not the effects of taxation or transaction costs. If dividends and interest were not reinvested, then the above results would be considerably different. The model was developed with the benefit of hindsight and the results do not represent actual trading, which may be influenced by real-time market and economic events.

The S&P 500 Index is a market-capitalization-weighted index of 500 of the largest publicly traded companies listed on US stock exchanges. The S&P 500 Total Return Index was determined to be an appropriate benchmark because portfolio holdings are selected from the S&P 500. Benchmark returns do not reflect the deduction of advisory fees. You cannot invest directly in an index.

High-Q is rebalanced semi-annually. Actual performance of client portfolios may differ materially due to the timing of investment of capital, the reinvestment of dividends, length of time various positions are held, client objectives and restrictions, and fees and expenses incurred by the individual portfolio.

The charts, tables, performance, and other information shown are provided to you for informational purposes only and are not intended to be and do not constitute investment or tax advice nor an opinion or recommendation regarding the appropriateness of any investment. The material contained in this document is for general information purposes and is not intended as an offer or a solicitation for the purchase and/or sale of any security or financial instrument, nor is it advice or a recommendation to enter into any transaction. Future returns may differ significantly from past returns due to materially different economic and market conditions. Diversification does not ensure a profit or guarantee against loss.
