Disclosures

Management fees of 0.35% annually, our highest published fee, have been deducted from the gross performance results for the IRON Income & Growth portfolio ("Income & Growth"). Client accounts are charged quarterly in arrears based on the quarter-end value adjusted for capital flows. Net returns reflect a monthly accrued deduction of management fees. IRON's fees are available upon request and may be found in our Form ADV Part 2A disclosure brochure.

Investments within portfolios, and therefore, portfolios, involve risk and the possibility of loss, including a permanent loss of principal. Performance results are based on a hypothetical model portfolio from inception of July 1, 2020 through December 31, 2021. No accounts were managed using this portfolio during this period. From December 31, 2021 to the present, performance results are based on a composite consisting of eligible client accounts. Inclusion of an account within the composite is determined on a monthly basis, requires investment in the Income & Growth portfolio for the entire calendar month, and a beginning monthly balance of at least \$5,000. Performance for periods longer than a year has been annualized using a geometric mean. Actual performance of client portfolios may differ materially due to the timing of investment of capital, the reinvestment of dividends, length of time various positions are held, client objectives and restrictions, and fees and expenses incurred by the individual portfolio.

The model performance shown is hypothetical and for illustrative purposes only. Model portfolio monthly returns were computed based on the daily total returns of underlying securities. Model performance does not include trading costs. Performance data for the model assumes reinvestment of dividends but not the effects of taxation or transaction costs. If dividends and interest were not reinvested, then the above results would be considerably different. The model was developed with the benefit of hindsight and the results do not represent actual trading, which may be influenced by real-time market and economic events.

The S&P 500 Index is a market-capitalization-weighted index of 500 of the largest publicly traded companies listed on US stock exchanges. The S&P 500 Total Return Index is shown for comparison purposes because we feel it is more well understood by investors than a blended benchmark and would therefore better allow investors to compare and contrast various characteristics, such as volatility measures. Benchmark returns do not reflect the deduction of advisory fees. You cannot invest directly in an index.

"AGG" and "US Bonds" refer to the iShares Core U.S. Aggregate Bond ETF, which seeks to track the investment results of an index composed of the total U.S. investment-grade bond market.

The charts, tables, performance, and other information shown are provided to you for informational purposes only and are not intended to be and do not constitute investment or tax advice nor an opinion or recommendation regarding the appropriateness of any investment. The material contained in this document is for general information purposes and is not intended as an offer or a solicitation for the purchase and/or sale of any security or financial instrument, nor is it advice or a recommendation to enter into any transaction. Future returns may differ significantly from past returns due to materially different economic and market conditions. Diversification does not ensure a profit or guarantee against loss.
